

## **VACANCY: SENIOR PRODUCT OWNER & SOLUTIONS ARCHITECT – CAPE TOWN**

### **THE ROLE:**

As a **Senior Product Owner & Solutions Architect** at **The Training Room Online (TTRO)**, you will be part of TTRO's Product department and work as part of a cross-functional team to conduct business and process analyses, create user experience design and translate client requirements into technical, functional and design specifications for digital learning environments that you are responsible for (Product Owner). You will create impactful, user-centred digital learning solutions that bring about business success for our clients, develop skilled citizens of the future and contribute to socio-economic reform in South Africa and beyond.

### **REQUIREMENTS:**

- Tertiary IT, business, business analyst, design qualification or similar
- 4+ years' experience in UX design, solutions architecture, business analysis, product management or similar
- 2+ years' experience in an Agile environment
- Beneficial: Certified Scrum Product Owner
- Ability to relate to target users, in organising information, and in designing interactive experiences
- Deep understanding of learning management and content management strategies and systems
- Ability to think out of the box and to innovate platforms beyond industry trends
- Passionate about e-learning, innovation, technology and UX design
- Good analytical and logical thinking.
- Experienced and motivated to work with cross-functional teams, including business development, product management and development
- Outstanding communication, presentation and leadership skills
- Pro-active, organised and structured
- Excellent time management skills
- Diligent and flexible with strong attention to detail
- Creative thinker with a vision

- Positive, energetic & professional
- Service driven and have experience in building excellent, lasting relationships (both internal and in limited cases external)

**RESPONSIBILITIES:**

- Define product vision, road-map and growth opportunities
- Present platform roadmaps and functional scopes to funders and stakeholders
- Lead the planning product release plans and set expectation for delivery of new functionalities
- Provide backlog management, iteration planning, and elaboration of the user stories
- Research and analyse market, the users, and the roadmap for the product
- Consult around systems, architectures and functional scopes
- Align to best practice methodologies in terms of data driven and activity centric solution design of organisational support systems
- Perform technical and business requirement workshops with clients, users and other stakeholders
- Develop bespoke user experience designs based on individual client requirements
- Translate client-individual business requirements into of technical, functional and design documentation
- Guide internal and external development teams throughout the entire development and implementation process within an agile development framework
- Take full accountability for the solution design and overall quality of the development of all software solutions assigned to you
