

The Training Room Online (TTRO) is an organisation of passionate and talented individuals who design and develop innovative learning solutions to upskill and empower people for now and for the future. We believe in driving change through next generation learning by combining immersive technologies and learning methodologies to deliver relevant competencies that add value to your organisation and your people.

As a Senior Digital Designer at TTRO, you will be part of our Learning Technology Engineering department, working with a cross-functional team to create and design modern user interface designs for digital learning environments with a core focus on people. This senior design role has a focus on user interface design (UI) and user experience (UX) and an amazing opportunity to get involved in the EdTech industry.

Your Key Responsibilities:

- Wire-framing: Translate client requirements into high level designs, low fidelity mock-ups, wireframes, storyboards, and screen flows and interactive prototypes.
- Understanding customer/user personas (develop user stories and journeys).
- Brand alignment (internal branding and customer).
- Develop user-centric UX design deliverables using UX software such as InVision, Balsamiq, Axure, Sketch and Adobe Creative Suite.
- Develop bespoke user experience designs based on individual client requirements and briefs.
- Translation of low-fidelity mock-ups into high-fidelity concepts for implementation.
- Work closely with the development team to implement the designed solution and ensure correct design alignment.
- Competitively position the user experience through activities that improve the usability, usefulness, and desirability of TTRO's flagship solutions.
- Establish and promote design guidelines, best practices and standards.
- Ensuring design excellence across solutions.

What you'll bring to the team:

- Tertiary degree/diploma in a design-related field.
- Minimum 3-5 years' experience in UX/UI design.
- Strong design portfolio including UI design concepts and deliverables.
- Comprehensive experience and proven skills in Adobe XD, Photoshop and Illustrator.
- Good understanding of user-centred design practices and ideation tools.
- Good understanding of responsive design principles.

- Ability to relate to target users, in organising information, and in designing interactive experiences.
- Positive, energetic and professional.
- Passionate about e-learning, innovation, technology and UI/UX design.
- Expertise in UX software such as InVision, Figma, Balsamiq, Axure, Sketch and Adobe Creative Suite.
- Ability to think out of the box to innovate platforms beyond industry design trends.
- Good analytical and logical thinking.
- Experienced and motivated to work with cross-functional teams, including business development, product management and development.
- Outstanding communication, presentation and leadership skills.
- Proactive, organised and structured.
- Excellent time management skills.
- Diligent and flexible with strong attention to detail.
- Creative thinker with a vision to deliver.
- Positive, energetic and professional.
- Human-centred design.
- Design quality assurance.
